MARKET MINDZ

Scenario:
You work for a market research firm called MarketMindz that is collaborating with a retail vendor that specializes in food and beverage products.

Problem:
Your client is a small company and they are still learning their market and evaluating their customers.

As a BI developer, you have just been handed your first sample of marketing data. Your client would love for you to build a BI tool that surfaces insights around a few specific items of interest:

- How are our 6 recent marketing campaigns performing?
- How are our products performing?
- Who are our customers?
- What is driving campaign performance and buyer decision-making?

Developed by : Ankita
